

Design requirement

(Email from our client David)

Dear Designer,

I hope this message finds you in great spirits. As an architect deeply passionate about modern and sustainable design, I'm reaching out with a project that's very close to my heart. I'm in the process of bringing a vision to life—a set of 10 dining room chairs that's not just a piece of furniture but a statement of my lifestyle and values.

Here's What I Envision:

I'm drawn to contemporary style, embracing minimalism with open arms. My home is a testament to my love for clean lines and functional aesthetics, and I seek to extend this philosophy to this new chair design. I imagine it in neutral tones, allowing for the occasional bold accent through customization options. The materials, of course, need to echo my commitment to sustainability—a combination of natural wood and high-quality, eco-friendly fabrics would be ideal.

Design Specifications:

- **Dimensions:** A height of 36 inches, with a seat height of 18 inches, seems perfect. The width and depth should be about 18 and 16 inches, respectively, providing ample space without compromising the minimalist design.
- **Comfort and Ergonomics:** Given my love for hosting dinner parties, the chair must offer comfort for long conversations. A curved backrest for lumbar support and a cushioned seat are essential.
- **Materials:** Solid oak or a similar hardwood for the frame would complement my home's aesthetic, paired with durable and stain-resistant fabric that's sourced responsibly.

Functionality Needs:

The chair should be lightweight, making it easy to move around, yet sturdy enough to withstand the joyous chaos of my gatherings. I also need to ensure the feet are kind to my flooring—no scratches are welcome.

Sustainability and Quality:

I value furniture that reflects my dedication to sustainable living and modern design. It should be durable and sourced from eco-friendly suppliers, aligning with my values and lifestyle.

Budget and Timeline:

I've allocated \$1000 to \$1500 per unit for this project, aiming for a balance between impeccable quality and affordability. Ideally, the design would be finalized within 30 days from now, with a prototype ready for review 60 days later and production commencing 90 days after prototype approval.

Additional Considerations:

Ease of assembly and eco-friendly packaging that ensures safe transport without compromising our planet's health is crucial.

I'm thrilled at the prospect of working together to create a piece that serves its purpose and does so with style and conscience. Your talent in design and understanding of functional aesthetics make you the perfect partner for this venture.

Looking forward to your thoughts and ideas.

Best regards,
David Thompson

Client's Persona

David Thompson

- Age: 35
- Occupation: Architect
- Location: San Francisco, California
- Marital Status: Married
- Interests:
 - Passionate about modern and sustainable architecture.
 - Enjoys reading about interior design and home renovation.
 - Loves outdoor activities like hiking and cycling.
- Lifestyle:
 - Lives in a well-designed, modern home.
 - Prefers a minimalist and functional aesthetic.
 - Often hosts dinner parties and small gatherings.
 - Has a few dogs of varying ages
- Purchase Motivations:
 - Seeking furniture that reflects his taste for modern design.
 - Values sustainability and eco-friendly materials.
 - Wants durable, high-quality furniture that can withstand regular use.
- Functional Needs:
 - Comfortable for long dinner conversations, easy to move, and matches with a diverse range of dining tables.
 - Able to stand pets' daily activities
- Aesthetic Preferences:
 - Prefers neutral tones with occasional bold accents.
 - Likes clean lines and uncluttered spaces.
 - Appreciates furniture that makes a statement but remains timeless.
